⚙ Skills

Languages   Java, HTML, CSS, JavaScript, Python
Technologies   ReactJS, MySQL, NodeJS, Express, SpringBoot

⚗ Projects

Job Application Tracker   Fullstack PWA

> Expedited my work productivity by eliminating over 12 hours of manual email sorting
> Backend designed with Node/Express that connects to a SQL database using Sequelize's ORM, deployed with Heroku
> Frontend designed with ReactJS, connects to the exposed RESTful endpoints with Axios
> Implements long polling techniques to automatically update application status and send changes via SMS to my mobile phone

GradeCalc Grade Calculator   Mobile App

> Eliminated 30 hours of manual grade calculation for my professor as well as calculation time for fellow students
> Designed to assist fellow students and instructor in my Statistics course which allowed them to accurately develop a course strategy
> Functional cross-platform mobile application designed and developed with React Native

CMR Entertainment Website   Website

> Frontend web development project designed using ReactJS
> Developed a user-friendly website to display information in an organized manner to potential clients
> Boosted website security by overhauling the previous system's flawed FTP-based deployment system in favor of a more modern CI/CD-based system using Netlify

◔ Work Experience

Systems Innovation Engineering   Feb. 2022 – Current
Fullstack Web Developer   *Glassboro, NJ*

> Developed user-facing solutions using React.js to streamline data entry and analysis
> Leveraged REST API in OpenAPI to perform CRUD operations
> Optimized API calls to scale to a noSQL database with hundreds of entries
> Utilized tools such as Postman to automate route testing

The Edge Fitness Clubs   Dec. 2017 – Sep. 2021
